## **Summary**

- Overview
- Events and Committee Membership
- Ongoing projects and More!
- Conclusion

## **Overview**

Initially, I sought to enter the ASA as VP Academic, but little old me did not find out I could not be a VP and a club executive until two days before nominations closed. I want to thank Philip for nominating me, as I would not have been part of such a great year if it was not for that fateful day I was voted in. I have been involved in student governance for the past seven years of my life; this year in the ASA has been my favourite of all seven years. I believe that the greatest accomplishment of my term as Off-Campus Rep has been the knowledge I have acquired to serve in my future terms better.

## **Events and Committee Membership**

I was on shift throughout all of winter formal this year; I found the bus shift to be quite entertaining, which made the few hours fly by. I also helped out in setting up the pizza, that taught me that people go nuts for free food, and in particular, if it is free pizza (honestly who wouldn't). The most significant personal success of the semester was the winter term Off-Campus Super (shoutout to Rebecca because she is the real mastermind behind it). I was also part of some other events, such as the AGM, Trick for Eats, and many more (honestly, I cannot remember them all; they were plenty, to say the least).

Some committees within the ASA I was part of include the lone parent bursary and grant committees. I believe those are all for the ASA, but if anyone is interested (which I commend you for making it this far in my rambling), I was part of six committees this year within the university.

## **Ongoing Projects and More!**

For ongoing projects, in my transition material, I will be constructing a detailed document to help future Off-Campus reps in planning the supper. This document will include

information on how to succeed in planning the supper but also how to avoid errors (such as some that occurred during the fall supper, which I believe was one of the few obstacles I faced during the year). Although this project is for SU Council, I will include it in case anyone finds it amusing (however, I do want to make it part of the ASA). Inspired by the north campus bus that takes students for groceries, this project is creating some transportation similar to this for students, with a focus on international students.

## **Conclusion**

I am very excited to work with next year's council! I am also looking forward to representing Augustana in North Campus in SU Council and GFC.
